FACTSET

Overview

Using an entity centric data model, FactSet's Symbology and Entity Master products provide access to FactSet's complete security and entity level symbology, comprehensive entity reference data, and all the necessary relationships and connections to create a foundation that tightly correlates disparate sources of information to a master entity identifier. All feeds are global in scope and include data for active and terminated entities and securities.

The mappings from FactSet Permanent Identifiers to standard public identifiers (e.g., CUSIP) as well as FactSet's proprietary entity and legacy identifiers can be used to navigate through FactSet's other Standard DataFeed packages. Additionally, these mappings can be used to connect third-party data sets and universes to FactSet content.

Packages

This section outlines the Symbology and Entity Master packages available in FactSet Standard DataFeeds.

Symbology Master

The Symbology Master provides FactSet's comprehensive security level symbology along with security level reference data for over 29 million security level, 5 million regional level and 18 million listing level securities. Data is available for both equity and fixed income securities unless otherwise noted.

Data items include:

- Current and historical mappings from standard market identifiers to FactSet's Permanent Identifiers

	Equity	Fixed Income
CUSIP	✓	✓
Historical CUSIP	✓	
SEDOL	✓	✓
Historical SEDOL	✓	
ISIN	✓	✓
Historical ISIN	✓	
Ticker	✓	✓
Historical Ticker	✓	
Bloomberg FIGI	✓	✓
Bloomberg Ticker	✓	✓
Wertpapierkennnummer (WKN, WPKN, WPK, Wert)	✓	

- Tickers are mapped at the regional and listing / exchange levels. Ticker history for Australia begins in 1964, and 1960 in the United States. For all other regions, history begins in 2015.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

- Mappings across FactSet's Permanent listing level, regional level, and security level Identifiers
- Security type classifications
- Security to exchange and currency mappings for equities
- Mappings from FactSet's Permanent Identifiers to CIC code and section 13F reportable securities included in the FactSet Symbology Universe
- Registered, 144A, Reg S, and Reg D flags, along with linkages between instrument identifiers for these securities
- Security to entity linkages mapping securities to their issuing entity, allowing connections between the Symbology and Entity Masters
- Current credit parent security to entity relationships
- Historical security to entity mappings, allowing connections between securities and entities on a specified date for both equity and fixed income securities
- Basic entity level reference data including entity name, entity type, country of domicile and industry / sector classifications (SIC, FactSet, RBICS)
- Mappings of FACTSET_ENTITY_IDs and FSYM_IDs that were duplicated and merged into other identifiers to dynamically manage the mapping of proprietary identifiers to the FSYM_ID. History back to 01-JAN-2015 is provided.
- Mappings of FACTSET_ENTITY_IDs for people and entities that have been deemed duplicates and as a result have been merged into other FACTSET_ENTITY_IDs. These relationships should be used to dynamically map FACTSET_ENTITY_IDs that have been merged away but may still exist in other FactSet content sets, or where users have mapped FACTSET_ENTITY_IDs to non-FactSet identifiers or to proprietary or third-party data. Complete history provided.

Additional Symbology Packages

Symbology Master Derivatives

This package can be added on to the Symbology Master package and contains identifier and metadata for both futures contracts and roots as well as options and their underlying identifiers. The universe is global in scope and contains both active and inactive contracts.

Historical Credit Parent

This package contains historical credit parent security to entity relationships.

Third Party Entity Identifiers

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

This package contains third party entity identifiers including Edgar Central Index Keys (CIK), Central Registration Depository (CRD), Legal Entity Identifier (LEI), Employer Identification Number (EIN), Federal Reserve RSSD Identifier (RSSD), the UK Companies House Identifier (UKCH), and Japanese Corporate Numbers (JCN).

Entity Master

This package contains comprehensive entity level symbology and firmographics as well as historical entity structure data for over 14 million entities. Entity Firmographics data is available by itself or as part of the Entity Master package.

Data items include:

- **Entity Firmographics**
    - Entity type and industry /sector classifications (SIC, NAICS, NACE, and FactSet)
    - Location information
        - Headquarters and secondary office locations with latitude and longitude coordinates for geocoding
        - Country definitions include country of risk, country of incorporation, and country of domicile
        - Contact information
    - Entity names including legal names, former names, and trade / DBA names
    - Entity identifiers including Edgar Central Index Keys (CIK), Central Registration Depository (CRD), Legal Entity Identifier (LEI), Employer Identification Number (EIN), Federal Reserve RSSD Identifier (RSSD), the UK Companies House Identifier (UKCH), and Japanese Corporate Numbers (JCN).
    - Related entities including current immediate and ultimate parents as well as related affiliates
    - Historical changes related to M&A activity, as well as entity type changes
    - Product and product line information for entities in FactSet's entity universe
- Current credit parent security to entity relationships
- Access to historical entity hierarchy relationships, including start and end dates, immediate and ultimate parent, and hierarchy depth for FactSet's global entity universe.
- Global universe of Entity Level Market Value for over 58,000 entities with daily history beginning from 2015-12-31
    - Four different calculations of Entity Level Market Value provided: including all share types, excluding non-traded shares, excluding treasury shares, and excluding both non-traded and treasury shares

FACTSET

Additional Entity Packages

Premium Private Market Identifiers

This comprehensive package provides an all-in-one solution for mapping a wide range of private market identifiers to FactSet's entity level symbology. Designed for clients requiring broad international coverage, the package consolidates the following individual identifier mappings into a single, convenient offering:

- **Australian Business Number (ABN) Identifier Mappings** – Mappings from Australian Business Number identifiers to FactSet's entity level symbology.
- **Creditsafe Identifier Mappings** – Mappings from Creditsafe identifiers to FactSet's entity level symbology.
- **Japanese Corporate Number (JCN) Identifier Mappings** – Mappings from Japanese Corporate Number identifiers to FactSet's entity level symbology.
- **Unified Social Credit Code (USCC) Mappings** – Mappings from Unified Social Credit Codes to FactSet's entity level symbology.
- **Value Added Tax (VAT) Identifier Mappings** – Mappings from VAT identifiers to FactSet's entity level symbology.

Crunchbase Identifier Mappings

This package contains mappings from Crunchbase identifiers to FactSet's entity level symbology. Users are required to have the proper license agreements in place with Crunchbase to subscribe to this package.

S&P Identifier Mappings

This package contains mappings from S&P issuer level identifiers to FactSet's entity level symbology. Users are required to have the proper license agreements in place with S&P to subscribe to this package.

Moody's Identifier Mappings

This package contains mappings from Moody's issuer level identifiers to FactSet's entity level symbology. Users are required to have the proper license agreements in place with Moody's to subscribe to this package.

Fitch Identifier Mappings

This package contains mappings from Fitch issuer level identifiers to FactSet's entity level symbology. Users are required to have the proper license agreements in place with Fitch to subscribe to this package.

SWIFT BIC Identifier Mappings

This package contains mappings from SWIFT BIC identifiers to FactSet's entity level symbology.

Chinese Business Names and Descriptions

This package contains business names and descriptions in Simplified and Traditional Chinese.

Address and People Mappings Packages

FactSet provides two mapping packages for addresses and people included in FactSet's Standard DataFeed products. The Address Mappings and the People Mappings packages are only included with the FactSet Standard DataFeeds that use the FactSet address and people identifiers respectively.

Legacy Identifier Mappings

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

These packages provide mappings from legacy FactSet identifiers to current FactSet identifiers.

Legacy Entity Mappings

This package contains mappings from legacy numeric entity identifiers to the alpha numeric FACTSET_ENTITY_IDs used in Standard DataFeed packages. Thirty days of history is provided.

Legacy Permanent Identifier Mappings

This package contains mappings from legacy regional FactSet permanent security identifiers to the current permanent security identifier scheme (FSYM_ID).

Retired Entity ID Mappings

This package contains mappings from entities that will be retired in future to surviving entities. While most Standard DataFeed packages already expose the surviving entities, entities that will be retired in future are partially available in a few packages, namely, Ownership.

Bundled Packages

Users subscribing to any of these packages also have access to the Standard DataFeed – Reference Hub package which contains mapping files that are shared across all content sets as well as those specific to the Symbology and Entity Master packages and historical foreign exchange rates.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Bundles

All of FactSet's Standard DataFeeds are delivered to the user's /datafeeds directory. The Symbology and Entity Master packages are delivered to the /datafeeds/symbology and /datafeeds/entity directories. The tables below include the list of packages and corresponding directories and bundle names.

Full refresh and incremental updates are delivered in separate bundles or ZIP files. A full refresh bundle contains files that are expected to be used to replace all the data in the corresponding tables. An update bundle contains a delete and update file for each file included in the full refresh. The ZIP bundle name of the full refresh bundle includes the word "full", while the ZIP bundle name for the incremental refresh does not.

Files

Each bundle contains a set of text files. The tables below include the list of files available in the Symbology and Entity Master packages full refresh bundles, and the corresponding table into which each file is loaded.

The incremental files are not included in the tables, but as mentioned above, an update bundle includes a delete and an update file for each file included in the full refresh. The incremental filenames will begin with the same filenames in the full bundle with "_update" or "_delete" appended to the filename.

FACTSET

Tables

Each file included in the feed is loaded into a table using schema details provided in the Data Dictionary section. The tables below provide descriptions for the tables included in the Symbology and Entity Master packages. Oracle users should refer to Appendix A for details on table names and field names that may differ.

Table 9: Symbology - Tables

Table Name	Table Description
SYM_13F_REPORTABLE	Contains the list of "Section 13(f) securities" as defined by Rule 13f-1(c) per the SEC.
SYM_BBG	Contains most recent and past mappings of FactSet Permanent Identifier (FSYM_ID) to Bloomberg Open Symbology (FIGI) mappings for those securities included in the FactSet Symbology universe.
SYM_BBG_EXCHANGE_MAP	Contains Bloomberg exchange and composite descriptions.
SYM_COVERAGE	Contains reference data on the securities and listings in the FactSet Symbology universe.
SYM_CREDIT_PARENT	Contains current FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) linkages for credit parent relationships.
SYM_CREDIT_PARENT_HIST	Contains historical FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) linkages for credit parent relationships.
SYM_CUSIP	Contains CUSIP to FactSet Permanent Identifier (FSYM_ID) mappings for those securities included in the FactSet Symbology universe.
SYM_CUSIP_LOAN	This table contains CUSIP, Private Placement Number (PPN), and Private Credit (PCL) to FactSet Permanent Identifier (FSYM_ID) mappings for bank loans included in the FactSet Symbology universe. CUSIPs are mapped to security level FactSet Permanent Identifiers.
SYM_CUSIP_HIST	Contains historical CUSIP to FactSet Permanent Identifier (FSYM_ID) mappings for those securities included in the FactSet Symbology universe.
SYM_ENTITY	Contains FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings for entities published in any Standard DataFeed.
SYM_ENTITY_SECTOR	Contains FactSet Entity Identifier (FACTSET_ENTITY_ID) to sector and industry classification mappings.
SYM_ENTITY_SECTOR_RBICS	Contains the current FactSet Entity Identifier (FACTSET_ENTITY_ID) to RBICS sector (level 2) mappings, including 3 million + private companies and subsidiaries. Level 3 and level 4 RBICS mappings for this universe can be found in the Standard DataFeed - RBICS Extended Universe - Industry Group package.
SYM_ENTITY_IDENTIFIERS	Contains entity level identifiers like CIK, CRD, EIN, RSSD, UKCH, JCN, and LEI.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Table Name	Table Description
SYM_FI_SEDOL_TICKER	Contains active fixed income exchange specific ticker to SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings for those listings included in the FactSet Symbology universe.
SYM_FI_TC	Contains basic terms and conditions reference data like coupon, maturity date, and bond type for fixed income securities.
SYM_FUTURES_CONTRACT	Contains the master list of identifiers and contract level data for global futures contracts, including continuous contracts.
SYM_FUTURES_ROOT	Contains the master list of root tickers and root level data for global futures.
SYM_FUT_CONTRACT_BBG	Contains the master list of identifiers and Bloomberg ticker mappings, along with their exchange code and market source.
SYM_FUT_ROOT_BBG	Contains the master list of FactSet roots mapped to Bloomberg roots for global futures.
SYM_ISIN	Contains ISIN to FactSet Permanent Identifier (FSYM_ID) mappings for those securities included in the FactSet Symbology universe.
SYM_ISIN_HIST	Contains historical ISIN to FactSet Permanent Identifier (FSYM_ID) mappings for those securities included in the FactSet Symbology universe.
SYM_MERGED_ENTITY_ID	Contains FactSet entity and person identifiers (ending in "-E") that have been merged away into other identifiers.
SYM_MERGED_FSYM_ID	Contains FSYM_IDs that have been duplicated, and as a result have been merged into other FSYM_IDs. History back to 01-JAN-2015 is provided.
SYM_OPTIONS	Contains the master list of identifiers and contract level data for active and inactive global options contracts.
SYM_REGION	Contains the package region for securities and listings in the FactSet Symbology universe.
SYM_REGISTERED	Contains registration type details for corporate, government and agency bonds. It also contains linking between Registered, 144A, Reg S and Reg D instrument identifiers.
SYM_SEC_ENTITY	Contains FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings for those securities included in the FactSet Symbology universe.
SYM_SEC_ENTITY_HIST	Contains historical and current FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings, with dates, for those entities included in the Symbology universe. These mappings are provided for equity and fixed income securities at the security FSYM_ID level.
SYM_SEC_REGULATORY	Contains the FSYM_ID and CIC (Complementary Identification Code) for a given identifier.
SYM_SEDOL	Contains SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings for equity listings and fixed income securities included in the FactSet Symbology universe.
SYM_SEDOL_HIST	Contains historical SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings for those listings included in the FactSet Symbology universe.
SYM_TICKER_EXCHANGE	Contains exchange specific ticker to FactSet Permanent Identifier (FSYM_ID) mappings for equity listings and fixed income securities included in the FactSet Symbology universe.
SYM_TICKER_EXCHANGE_HIST	Contains historical exchange specific ticker to FactSet Permanent Identifier (FSYM_ID) mappings for listings included in the FactSet Symbology universe.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Table Name	Table Description
SYM_TICKER_REGION	Contains regional ticker to FactSet Permanent Identifier (FSYM_ID) mappings for listings included in the FactSet Symbology universe.
SYM_TICKER_REGION_HIST	Contains historical regional ticker to FactSet Permanent Identifier (FSYM_ID) mappings for listings included in the FactSet Symbology universe.
SYM_WKN	Contains current FSYM_IDs to WKN mappings for securities in FactSet's Symbology Universe.

Table 10: Entity – Tables

Note: Information for the SYM_ENTITY, SYM_ENTITY_SECTOR , SYM_ENTITY_SECTOR_RBICS and SYM_CREDIT_PARENT tables can be found under Table 9: Symbology - Tables.

Table Name	Description
ENT_ENTITY_ADDRESS	Contains address information for entity locations. Headquarters and secondary office locations are included.
ENT_ENTITY_ADDRESS_COORD	Contains latitude and longitude coordinates for specific address locations.
ENT_ENTITY_AFFILIATES	Contains ownership-based relationships between entities. Percent held is provided if FactSet has collected ownership data.
ENT_ENTITY_CHANGES	Contains a history of changes to entities. The following types of changes are included in this file: FACTSET_PARENT_ENTITY_ID and ENTITY_TYPE.
ENT_ENTITY_CN_NAMES	Contains business names in Simplified and Traditional Chinese.
ENT_ENTITY_CN_PROFILES	Contains business descriptions in Simplified and Traditional Chinese.
ENT_ENTITY_CONTACT	Contains additional contact information for entities, including corporate email and registered address.
ENT_ENTITY_COUNTRY_PROPS	Contains country level information including EEA and OECD participation.
ENT_ENTITY_COVERAGE	Contains descriptive data about the entity for the full universe of business entities covered by FactSet. Individuals will be included if they are part of an entity tree.
ENT_ENTITY_DESCRIPTIONS	Contains textual business descriptions for all entities in FactSet's universe.
ENT_ENTITY_IDENTIFIERS	Contains entity level identifiers including CIK, CRD, EIN, RSSD, UKCH, JCN and LEI. This table may also contain SWIFT BIC, VAT, ABN, USCC, Creditsafe, and Crunchbase Identifiers based on user subscriptions.
ENT_ENTITY_METRO_AREAS	Contains mappings from entities to metro area identifiers.
ENT_ENTITY_MKT_VAL	Contains a time series of company market values at the FactSet Entity ID (-E) Level. ETFs and Funds are not included.
ENT_ENTITY_NAICS_RANK	Contains NAICS industry classification codes for entities.
ENT_ENTITY_NAMES	Contains other names that the entity may be referred to as, including former names, legal names, local names, trade/DBA names, and acronyms.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Table Name	Description
ENT_ENTITY_PROFILES	Contains textual overviews of entities, including business description, product lines, and investment approach and overview.
ENT_ENTITY_RELATIONSHIPS	Contains relationships between two entities. Relationships include Dual Listed Company, Corporate Broker, Share Registrar, NOMAD, Financial Advisor, Variable Interest Entity, Fund Contributor and Fund Investment Manager.
ENT_ENTITY_STATUS	Contains entities that have had a status change. Bankruptcy is currently the only status change captured in this table.
ENT_ENTITY_STR_HIST	Contains current and historical entity hierarchy relationships, with dates, including immediate and ultimate parent.
ENT_ENTITY_STRUCTURE	Contains current entity hierarchy relationships, including immediate and ultimate parent.
ENT_FITCH_IDS	Contains mappings from the FACTSET_ENTITY_ID to the Fitch issuer level identifier.
ENT_MOODYS_IDS	Contains mappings from the FACTSET_ENTITY_ID to the Moody's issuer level identifier.
ENT_SP_IDS	Contains mappings from the FACTSET_ENTITY_ID to the S&P issuer level identifier.

Table 11: Address and People Mappings – Tables

Note: Information for the SYM_ENTITY table can be found under Table 9: Symbology - Tables.

Table Name	Table Description
SYM_ADDRESS	Contains mappings for ADDRESS_IDs published in any Standard DataFeed.

Table 12: Legacy Identifier Mappings - Tables

Table Name	Table Description
SYM_LEGACY_ENTITY_ID	Contains mapping of legacy entity identifiers that can be found in legacy or custom feeds to the alpha numeric FACTSET_ENTITY_ID used in Standard DataFeed packages.
SYM_LEGACY_PERM_ID	Contains mappings from legacy FactSet security permanent identifiers to the new FSYM identifiers.
SYM_RETIRED_ENTITY_ID	Contains mappings from entities for funds that will be retired in future to surviving entities.

Schedule

A weekly full refresh of all bundles will be made available on Saturdays. Delta files are scheduled to run throughout the day depending on the package, from Sunday to Saturday. At least one delta file will be posted each day, and the contents may or may not be empty depending on the underlying changes in the database. Legacy Entity Mappings files are scheduled to deliver once a day.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

The delivery schedule is an approximation based on current delivery times. This is subject to change.

In case of a delay, FactSet will send a Notify message. See the General User Guide for guidance on scheduling loads and setting up FactSet Notify.

Schema Feed

The Schema Feed provides files and documents relevant to the Symbology and Entity Master packages. The schema files are in the /datafeeds/documents/docs_sym and the /datafeeds/documents/docs_ent directories and the Sample DataFeed schema files are in the /datafeeds/documents/docs_spl and the /datafeeds/documents/docs_s_ent directories. The /docs_sym, /docs_ent, /docs_spl and /docs_s_ent folders contain a schema zip bundle that contains the latest schema file, table generations statements, and update file.

Table 13: Schema Feed

Directory	Zip Bundle
/datafeeds/documents/docs_sym	sym_v1_schema_#.zip
/datafeeds/documents/docs_spl	spl_v2_schema_#.zip
/datafeeds/documents/docs_ent	ent_v1_schema_#.zip
/datafeeds/documents/docs_s_ent	s_ent_v1_schema_#.zip

Documentation

Documentation for all Standard DataFeed products and packages, such as this User Guide, can be found on page 15222 of FactSet's Online Assistant (OA) You must log in using your FactSet.net ID as your username. If you do not have a username, contact your FactSet Account Representative.

Important changes to this User Guide and related documentation will be announced through FactSet Notify.

Queries

Sample queries for the Symbology and Entity Master feeds can be found at FactSet Data Navigator. You must log in using your FactSet.net ID as your username. If you do not have a username, contact your FactSet Account Representative.

FACTSET

Content Methodology

For more information regarding the methodology of the Symbology and Entity data, refer to the Standard DataFeed Symbology and Entity Master Content Methodology document.

Sample

Bundles

FactSet's Sample DataFeeds use the same full refresh and incremental update methodology used by the Standard DataFeeds.

All of FactSet's Sample DataFeeds are delivered to the user's /datafeeds/samples directory. Packages are broken down into different bundles and are delivered to subdirectories within the /datafeeds/samples/symbology and the /datafeeds/samples/entity directories.

The Sample DataFeed bundle names are similar to the Standard DataFeed bundle names but have "_sample" appended to them. The tables below contain the list of packages and the corresponding directories and bundle names.

Retired Entity Identifier Mappings - Sample	/samples/symbology/sym_retired_entity_ids	sym_retired_entity_ids_v1_sample

Files

Each bundle includes a set of text files. The tables below show the list of files included in each full refresh bundle, and the table into which the file is loaded. The table names are the same as the Standard DataFeed table names.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

The incremental files are not included in the tables, but as mentioned above, an update bundle includes a delete and an update file for each file available in the full refresh. The incremental filenames will begin with the same filenames in the full bundle, and then will have either "_update" or "_delete" appended to the filename.

Table 18: Symbology Master – Bundles and Files - Samples

Bundle Prefix	Text File Name	Table Name

Universe

The Symbology and Entity Master samples are based on a predefined list of entities. The list of entities can be found in the FactSet Standard DataFeed General User Guide.

The sym_merged_fsym_id_sample.txt file includes FactSet Permanent Security Identifier corrections that have occurred within the last 7 days.

The sym_address_sample.txt file includes any Address Identifier that appears in any of the FactSet Standard DataFeed sample packages.

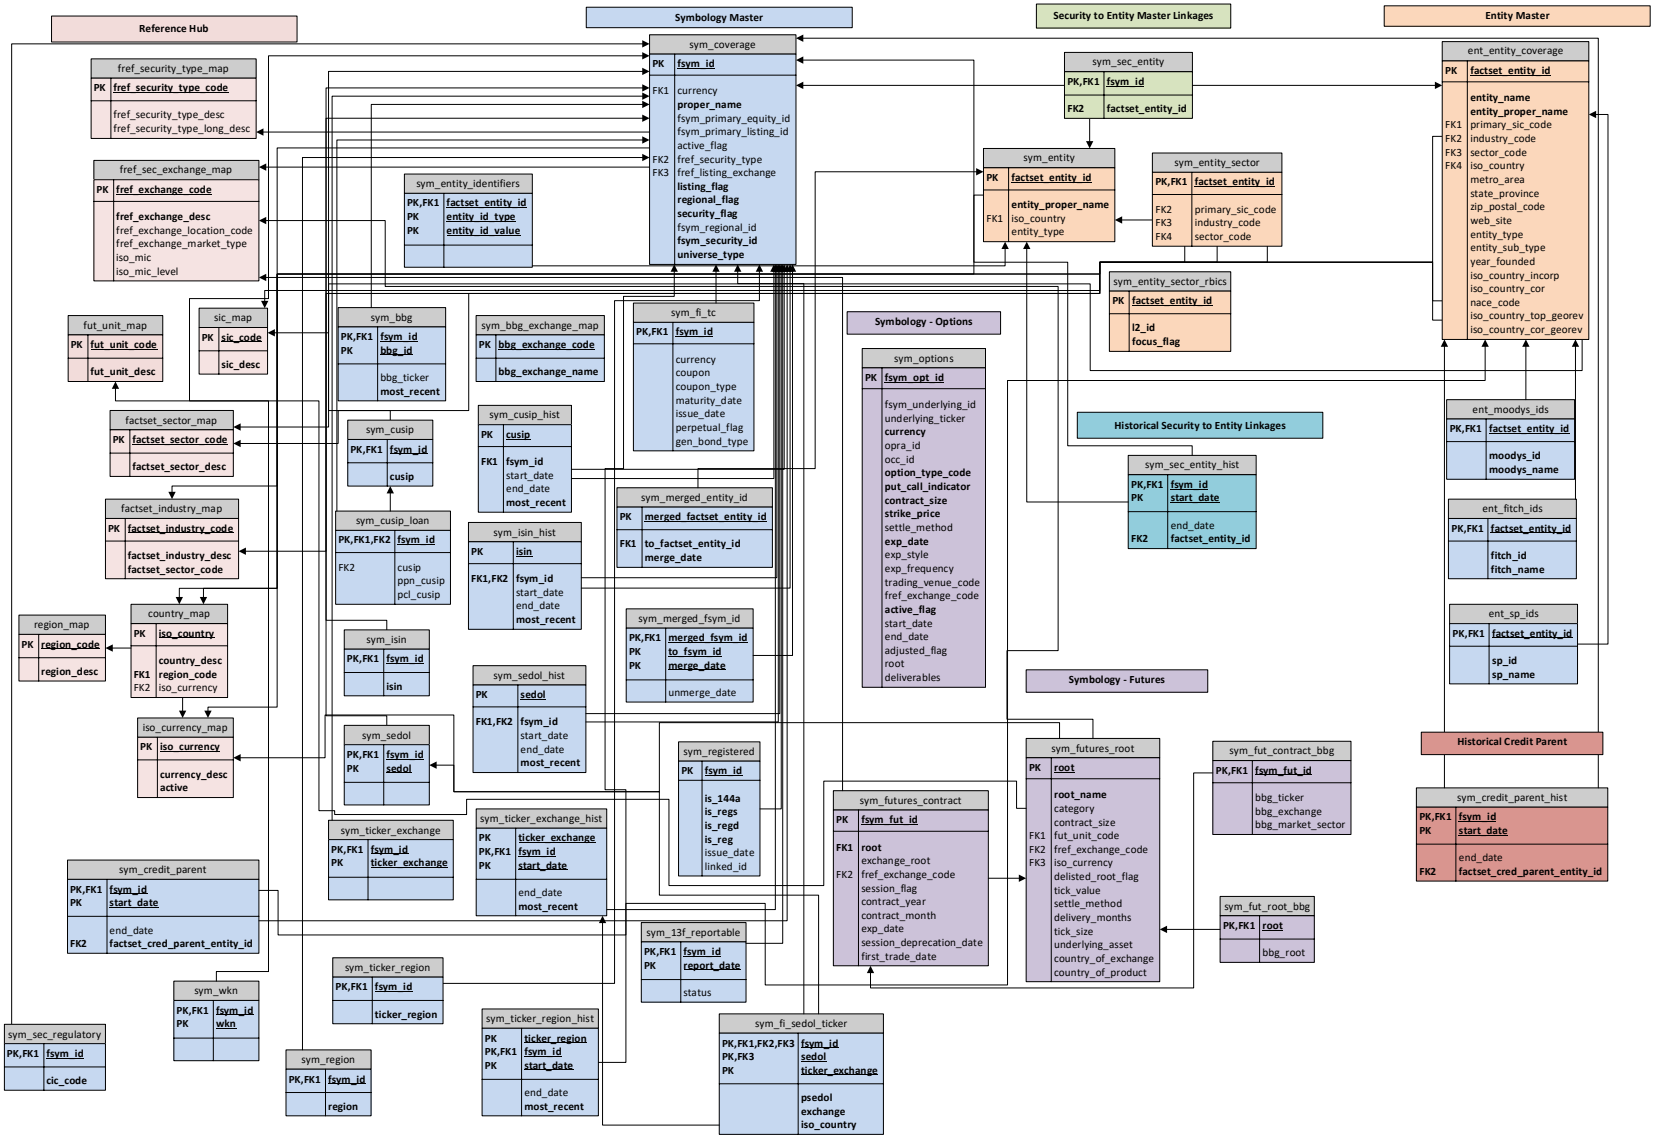

The sym_people_sample.txt file includes any FactSet Person Entity Identifier that appears in any of the FactSet Standard DataFeed sample packages.

The sym_legacy_entity_id_sample.txt file includes the full universe of mappings.

Data Dictionary

This section includes details about the schemas used in the Symbology and Entity Master packages.

Symbology

sym_13f_reportable

This table contains the list of "Section 13(f) securities" as defined by Rule 13f-1(c) per the SEC.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	FBJRR9-S	Unique FactSet-generated identifier assigned to a security
REPORT_DATE	DATE	No	2001-09-30	Calendar quarter end date that corresponds with the period for which the 13F was filed
STATUS	VARCHAR(20)	Yes	ADDED	Code indicating revisions that have made to the list. The word "ADDED" indicates that the security has become a Section 13(f) security. The word "DELETED" indicates that the security ceases to be a 13(f) security since the date of the last list.

sym_bbg

This table contains most recent and past mappings of FactSet Permanent Identifier (FSYM_ID) to Bloomberg Open Symbology (FIGI) mappings for those securities included in the FactSet Symbology universe.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00055-S	Unique FactSet-generated identifier assigned to a security
BBG_ID	CHAR(12)	No	BBG003FJW6C3	Bloomberg FIGI
BBG_TICKER	CHAR(30)	Yes	IBM US	Bloomberg ticker assigned to the security
MOST_RECENT	BOOLEAN	No	0	Flag indicating whether the identifier is the most recent for the security

sym_bbg_exchange_map

This table contains Bloomberg exchange and composite descriptions.

Field Name	Type	Nullable	Example	Description
BBG_EXCHANGE_CODE	VARCHAR(4)	No	UN	Bloomberg Exchange Code
BBG_EXCHANGE_NAME	VARCHAR(120)	No	NYSE New York Stock Exchange	Bloomberg Exchange Name

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_coverage

This table contains reference data on the equity and fixed income securities and listings in the FactSet Symbology universe. FSYM_ID is represented at the security (-S), regional, (-R), or listing (-L) level.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B006F7-L	Unique FactSet-generated identifier representing a security, regional, or listing level instrument
CURRENCY	CHAR(3)	Yes	EUR	Code representing the currency in which the security or listing trades
PROPER_NAME	VARCHAR(200)	No	Deutsche Wohnen AG	Name of the security associated with the identifier
FSYM_PRIMARY_EQUITY_ID	CHAR(8)	Yes	X5D74Q-S	FactSet Permanent Identifier representing the primary equity on the identifier's most liquid exchange
FSYM_PRIMARY_LISTING_ID	CHAR(8)	Yes	NULL	Most liquid individual listing for a currency and country or security
ACTIVE_FLAG	BOOLEAN	Yes	1	Flag indicating whether the record is currently active (1) or inactive (0). Note that this field is not supported for bank loans; therefore, null values represent "unknown".
FREF_SECURITY_TYPE	VARCHAR(40)	Yes	SHARE	Code denoting the security's type. Note that for some fixed income securities, the security type cannot be determined; those records will display a null value.
FREF_LISTING_EXCHANGE	VARCHAR(4)	Yes	FRA	Code denoting the exchange on which the security trades
LISTING_FLAG	BOOLEAN	No	1	Flag indicating that the identifier represents an individual listing
REGIONAL_FLAG	BOOLEAN	No	0	Flag indicating that the identifier represents the most liquid listing for a specific currency and country
SECURITY_FLAG	BOOLEAN	No	0	Flag indicating that the identifier represents a security
FSYM_REGIONAL_ID	CHAR(8)	Yes	MBSR11-R	Regional level FactSet Permanent Identifier associated with the identifier
FSYM_SECURITY_ID	CHAR(8)	No	X5D74Q-S	Security level FactSet Permanent Identifier associated with the identifier

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

UNIVERSE_TYPE	CHAR(2)	No	EQ	Code denoting whether the security is considered equity (EQ) or fixed income (FI) by FactSet Symbology

sym_credit_parent

This table contains current FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) linkages for credit parent relationships.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	CXDTZR-S	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	No	2022-03-30	Date the identifier was first associated with the FSYM_ID
END_DATE	DATE	Yes	2025-03-31	Date the identifier was last associated with the FSYM_ID
FACTSET_CRED_PARENT_ENTITY_ID	CHAR(8)	No	08FCVD-E	FactSet Entity Identifier representing the Credit Parent for a security at a single point in time

sym_credit_parent_hist

This table contains historical FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) linkages for credit parent relationships.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	FBJRR9-S	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	No	2007-10-05	Date the identifier was first associated with the FSYM_ID
END_DATE	DATE	Yes	2008-06-02	Date the identifier was last associated with the FSYM_ID
FACTSET_CRED_PARENT_ENTITY_ID	CHAR(8)	No	000BDR-E	FactSet Entity Identifier representing the Credit Parent for a security at a single point in time

sym_cusip

This table contains CUSIP to FactSet Permanent Identifier (FSYM_ID) mappings for equity and fixed income securities included in the FactSet Symbology universe. CUSIPs are mapped to security level FactSet Permanent Identifiers. Non-North American CUSIPs are included by default. For users with access to CUSIP, North American CUSIPs are included as well. This table does not include loans.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	N5QM6G-S	Unique FactSet-generated identifier assigned to a security
CUSIP	CHAR(9)	No	000001AI8	Unique nine-character identifier assigned to a security

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_cusip_loan

This table contains CUSIP, Private Placement Number (PPN), and Private Credit (PCL) to FactSet Permanent Identifier (FSYM_ID) mappings for bank loans included in the FactSet Symbology universe. CUSIPs are mapped to security level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B0DSSF-S	Unique FactSet-generated identifier assigned to a security
CUSIP	CHAR(9)	Yes	42237DAB4	CUSIP is a nine-character alphanumeric security identifier that captures the unique attributes of issuers and their financial instruments throughout the U.S. and Canada for direct loans, syndicated loans, and collateralized loan obligations (CLOs).
PPN_CUSIP	CHAR(9)	Yes	62974#AA6	National Association of Insurance Commissioners (NAIC) mandates the use of a uniform private placement number (PPN) by insurers to identify investments in annual statements. CUSIP Global Services creates, assigns, and administers the PPN system (a CUSIP-like numbering system).
PCL_CUSIP	CHAR(9)	Yes	758089AB2	A CUSIP service for the private credit market.

sym_cusip_hist

This table contains historical CUSIP to FactSet Permanent Identifier (FSYM_ID) mappings for equity securities included in the FactSet Symbology universe. CUSIPs are mapped to security level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
CUSIP	CHAR(9)	No	000001AI8	Unique nine-character identifier assigned to a security
FSYM_ID	CHAR(8)	No	N5QM6G-S	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	Yes	2000-07-26	Date the identifier was mapped to the FSYM_ID
END_DATE	DATE	Yes	2006-09-12	Date the identifier mapped to the FSYM_ID was considered inactive
MOST_RECENT	BOOLEAN	No	0	Flag indicating whether the identifier is the most recent for the security

sym_entity

This table contains FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings for entities published in any Standard DataFeed.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000BFT-E	Unique FactSet-generated identifier representing an entity

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ENTITY_PROPER_NAME	VARCHAR (72)	No	Aaron's, Inc.	Name that the entity is commonly referred to as, normalized and in proper case
ISO_COUNTRY	CHAR(2)	Yes	US	Two-letter code representing the country in which the entity is domiciled. This corresponds to the country of the company's headquarters.
ENTITY_TYPE	CHAR(3)	Yes	PUB	Three-letter code identifying the entity's structure

sym_entity_identifiers

This table contains entity level identifiers including CIK, CRD, EIN, RSSD, UKCH, JCN, and LEI.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	123456-E	Unique FactSet-generated identifier representing an entity
ENTITY_ID_TYPE	VARCHAR(12)	No	LEI	Code denoting a type of entity identifier
ENTITY_ID_VALUE	VARCHAR(100)	No	BH1KKKGKNGL4QXOTVL78	Identifier that corresponds with the ENTITY_ID_TYPE

sym_entity_sector

This table contains FactSet Entity Identifier (FACTSET_ENTITY_ID) to sector and industry classification mappings.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000BLS-E	Unique FactSet-generated identifier representing an entity
PRIMARY_SIC_CODE	CHAR(4)	Yes	6722	Four-digit code that identifies the business type of the entity
INDUSTRY_CODE	CHAR(4)	Yes	6010	FactSet proprietary industry code assigned to the entity
SECTOR_CODE	CHAR(4)	Yes	6000	Four-digit code identifying FactSet broad industry sector classification

sym_entity_sector_rbics

This table contains the current FactSet Entity Identifier (FACTSET_ENTITY_ID) to RBICS sector (level 2) mappings, including 3 million + private companies and subsidiaries. Level 3 and level 4 RBICS mappings for this universe can be found in the Standard DataFeed - RBICS Extended Universe - Industry Group package.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000BLS-E	Unique FactSet-generated identifier representing an entity
L2_ID	VARCHAR(200)	No	9520	RBICS level 2 identifier
FOCUS_FLAG	BOOLEAN	No	0	Flag indicating whether the company exists in the Revere Focus universe

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_fi_sedol_ticker

This table contains active fixed income exchange specific ticker to SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings for those listings included in the FactSet Symbology universe.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	P5SFZH-S	Unique FactSet-generated identifier assigned to a security.
TICKER_EXCHANGE	VARCHAR(50)	No	CDCCL-PAR	Exchange ticker assigned to the listing. The ticker is appended with the exchange code that corresponds to the exchange on which the listing trades.
PSEDOL	CHAR(7)	No	BGLCFY5	Primary seven-character identification code assigned to securities that trade on the London Stock Exchange and various smaller exchanges in the United Kingdom.
SEDOL	CHAR(7)	No	BGLCFY5	Seven-character identification code assigned to securities that trade on the London Stock Exchange and various smaller exchanges in the United Kingdom.
EXCHANGE	VARCHAR(25)	No	PAR	Exchange the listing is trading on.
ISO_COUNTRY	CHAR(2)	No	FR	Two-letter code for the country in which the entity is domiciled. This would be the country that corresponds to the entity's headquarters. For funds the domicile represents where the fund is registered and established.

sym_fi_tc

This table contains basic terms and conditions reference data like coupon, maturity date, and bond type for those listings included in the FactSet Symbology universe.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B009B5-S	Unique FactSet generated identifier assigned to a security
CURRENCY	CHAR(3)	Yes	EUR	The currency of denomination for the issue
COUPON	DOUBLE	Yes	3.5	Initial coupon rate, variable coupon rates are null
COUPON_TYPE	VARCHAR(10)	Yes	Fixed Listing	Coupon type for the issue
MATURITY_DATE	DATE	Yes	2031-07-21	Date when the security is expected to mature
ISSUE_DATE	DATE	Yes	2025-01-20	Issue/delivery date
PERPETUAL_FLAG	INTEGER	Yes	0	Returns 1 if the issue has no set maturity date; otherwise, 0. This will be null for municipal bonds.
GEN_BOND_TYPE	VARCHAR(75)	Yes	Bond/Note	Bond classification

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_futures_contract

This table contains the master list of identifiers and contract level data for global futures contracts, including continuous contracts.

Field Name	Type	Nullable	Example	Description
FSYM_FUT_ID	VARCHAR(30)	No	3YRM18-CBT	Unique FactSet generated identifier for a futures contract
ROOT	VARCHAR(10)	No	3YR	FactSet Root Symbol
EXCHANGE_ROOT	VARCHAR(30)	Yes	3YR	Denotes the session specific exchange root of a futures product
FREF_EXCHANGE_CODE	VARCHAR(6)	Yes	CBT	Session specific code denoting the FactSet exchange
SESSION_FLAG	CHAR(1)	Yes	D	Code indicating the trading session. Possible values include D = day / pit; N =evening / electronic; C = composite
CONTRACT_YEAR	INTEGER	Yes	2018	Year of the contract delivery
CONTRACT_MONTH	INTEGER	Yes	6	Month of the contract delivery
EXP_DATE	DATE	Yes	2018-06-29	Last day the contract can trade
SESSION_DEPRECATION_DATE	DATE	Yes	2018-06- 29	The date that specifies the session record was deprecated by an exchange.
FIRST_TRADE_DATE	DATE	Yes	2018-06- 29	The date on which the future started to be traded

sym_futures_root

This table contains the master list of root tickers and root level data for global futures.

Field Name	Type	Nullable	Example	Description
ROOT	VARCHAR(10)	No	AR	FactSet Root Symbol
ROOT_NAME	VARCHAR(200)	No	AUD / NZD (IFUS)	FactSet Root Description
CATEGORY	VARCHAR(200)	Yes	Currency	Textual description of the type of futures contract. Possible values include Energy, Foods and Materials, Grains, Livestock, Metals, Currency, Indexes, Interest Rates
CONTRACT_SIZE	DOUBLE	Yes	200000	Size of the contract

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

FUT_UNIT_CODE	VARCHAR(10)	Yes	AUD	Measurement units
FREF_EXCHANGE_CODE	VARCHAR(6)	Yes	IFUS	Code denoting the exchange of the parent
CURRENCY	VARCHAR(3)	Yes	NZD	Currency of the futures product
DELISTED_ROOT_FLAG	BOOLEAN	Yes	0	Flag indicating if the futures product has been delisted
TICK_VALUE	DOUBLE	Yes	1/10/1900	Minimum price movement in monetary terms usually a function of the lot size
SETTLE_METHOD	CHAR(1)	Yes	P	Denoting if cash or physical
DELIVERY_MONTHS	VARCHAR(50)	Yes	Mar, Jun, Sep, Dec	Array returning the delivery months
TICK_SIZE	DOUBLE	Yes	0.01	The minimum price increment change of a security and the price is quoted in decimal format.
UNDERLYING_ASSET	VARCHAR(30)	Yes	CES120-HKG	The underlying asset supported for Futures are Index and FX
COUNTRY_OF_EXCHANGE	CHAR(2)	Yes	HK	Two-letter code representing a country
COUNTRY_OF_PRODUCT	CHAR(2)	Yes	FR	The country where a product is produced or manufactured.

sym_fut_contract_bbg

This table contains the master list of identifiers and Bloomberg ticker mappings, along with their exchange code and market source.

Field Name	Type	Nullable	Example	Description
FSYM_FUT_ID	VARCHAR(30)	No	3YRM18- CBT	Unique FactSet generated identifier for a futures contract
bbg_ticker	VARCHAR(20)	Yes	UCOF2	Bloomberg ticker assigned to the security
bbg_exchange	VARCHAR(6)	Yes	CCME	Bloomberg Exchange Code
bbg_market_sector	VARCHAR(8)	Yes	comdty	A Bloomberg market source is a generic code that allows you to return a FactSet ticker (e.g., CURNCY)

sym_fut_root_bbg

table contains the master list of FactSet roots mapped to Bloomberg roots for global futures.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Field Name	Type	Nullable	Example	Description
ROOT	VARCHAR(10)	No	AR	FactSet Root Symbol
BBG_ROOT	VARCHAR(6)	Yes	PMC	The root portion of the full ticker. Example, if BBG_ticker is ESU4 then bbg_root is ES, month code U and single digit year 4

sym_isin

This table contains ISIN to FactSet Permanent Identifier (FSYM_ID) mappings for equity and fixed income securities included in the FactSet Symbology universe. ISINs are mapped to security level FactSet Permanent Identifiers. Non-North American ISINs are included by default. For users with access to CUSIP, North American ISINs are included as well.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00044-S	Unique FactSet-generated identifier assigned to a security
ISIN	CHAR(12)	No	GB0048658180	ISIN assigned to a security

sym_isin_hist

This table contains historical ISIN to FactSet Permanent Identifier (FSYM_ID) mappings for equity securities included in the FactSet Symbology universe. ISINs are mapped to security level FactSet Permanent Identifiers. Non-North American ISINs are included by default. For users with access to CUSIP, North American ISINs are included as well.

Field Name	Type	Nullable	Example	Description
ISIN	CHAR(12)	No	GB0048658180	ISIN assigned to a security
FSYM_ID	CHAR(8)	No	N5QM6G-S	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	Yes	2000-07-26	Date the identifier was mapped to the FSYM_ID
END_DATE	DATE	Yes	2006-09-12	Date the identifier mapped to the FSYM_ID was considered inactive
MOST_RECENT	BOOLEAN	No	0	Flag indicating whether the identifier is the most recent for the security

sym_merged_entity_id

This table contains any FactSet Entity or People identifiers (ending in "-E") that have been duplicated, and as a result have been merged into other FactSet Entity or People Identifiers. Complete history is provided.

Field Name	Type	Nullable	Example	Description
MERGED_FACTSET_ENTITY_ID	CHAR(8)	No	0CJNN5-E	Identifier that has been merged away
TO_FACTSET_ENTITY_ID	CHAR(8)	No	05WQ90-E	Identifier that the merged identifier has been merged into
MERGE_DATE	DATE	No	2012-05-02	Date on which the identifier was merged

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_merged_fsym_id

This table contains FSYM_IDs that have been duplicated, and as a result have been merged into other FSYM_IDs. History up to 01-JAN-2015 is provided.

Field Name	Type	Nullable	Example	Description
MERGED_FSYM_ID	CHAR(8)	No	B2D736-S	FactSet Permanent Identifier that has been merged away
TO_FSYM_ID	CHAR(8)	No	DJH2FD-S	FactSet Permanent Identifier that has been merged into
MERGE_DATE	DATE	No	2015-06-01	Date on which the identifiers were merged
UNMERGE_DATE	DATE	Yes	NULL	Date on which the identifiers were unmerged. Both identifiers are considered valid again on this date.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_options

This table contains the master list of identifiers and contract level data for active and inactive global options contracts.

Field Name	Type	Nullable	Example	Description
FSYM_OPT_ID	VARCHAR(40)	No	CLS.CA#CGRT9	FactSet-generated symbol for Option.
FSYM_UNDERLYING_ID	VARCHAR(100)	Yes	RT20YM-R	Unique FactSet-generated identifier representing a regional level instrument. Available for equity and futures options
UNDERLYING_TICKER	VARCHAR(50)	Yes	NSC.NYS.USD-COTC	Exchange ticker assigned to the listing. Available for FX and futures options.
CURRENCY	CHAR(3)	No	USD	Code representing the currency in which the security or listing trades
OPRA_ID	VARCHAR(20)	Yes	CLS#I1820D175000	Options Price Reporting Authority (OPRA) symbol
OCC_ID	VARCHAR(25)	Yes	CLS#200918C00017500	Options Clearing Corporation (OCC) symbol
OPTION_TYPE_CODE	INTEGER	No	1	Indicates whether option type is equity (1), ETF (12 or 99), Futures (60), FX (19), or Index (2)
PUT_CALL_INDICATOR	VARCHAR(4)	No	CALL	Indicates whether option is put or call
CONTRACT_SIZE	DOUBLE	No	200000	Size of the contract
STRIKE_PRICE	DOUBLE	No	17.5	Stated price per share. Underlying stock may be purchased (for call) or sold (for put) by option holder upon exercise of contract.
SETTLE_METHOD	VARCHAR(8)	Yes	PHYSICAL	Denoting if PHYSICAL or CASH
EXP_DATE	DATE	No	2018-06-29	Last day the contract can trade

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Field Name	Type	Nullable	Example	Description
EXP_STYLE	VARCHAR(10)	Yes	AMERICAN	Option expiration style. Either AMERICAN or EUROPEAN
EXP_FREQUENCY	VARCHAR(15)	Yes	M	Interval of expiration. For example, D stands for Daily Expiration.
TRADING_VENUE_CODE	INTEGER	Yes	37	Bourse code for where the option trades. Only available for LIF contracts.
FREF_EXCHANGE_CODE	VARCHAR(6)	Yes	ASE	Code representing the exchange on which the security trades
ACTIVE_FLAG	BOOLEAN	No	1	Flag indicating whether the contract is active or not
START_DATE	DATE	Yes	2018-06-29	Date the option was added
END_DATE	DATE	Yes	2018-06-29	Date the option ended
ADJUSTED_FLAG	INTEGER	Yes	1	Indicates whether it is an adjusted option from corporate actions
ROOT	VARCHAR(25)	Yes	ELN	Exchange-assigned root symbol used to identify the underlying option series across global markets. Supported option roots include OPRA (U.S.) and EUREX (Europe).
DELIVERABLES	VARCHAR(100)	Yes	ELN:100	Deliverables of the option (This data is only provided for the USA market.)

sym_region

This table contains the package region for securities and listings in the FactSet Symbology universe.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00055-S	Unique FactSet-generated identifier assigned to a security
REGION	VARCHAR(4)	No	EUR	Package region

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_registered

This table contains registration type details for corporate, government and agency bonds. It also contains linking between Registered, 144A, Reg S and Reg D instrument identifiers.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	T1CCV8-S	Unique FactSet-generated identifier assigned to a security
IS_144A	BOOLEAN	No	1	Flag indicating that the security is a Rule 144A offering
IS_REGS	BOOLEAN	No	0	Flag indicating that the security is a Reg S offering
IS_REGD	BOOLEAN	No	0	Flag indicating that the security is a Reg D offering, where the offering is limited to "accredited investors"
IS_REG	BOOLEAN	No	0	Flag indicating that the security is registered with the SEC
ISSUE_DATE	DATE	Yes	2013-02-01	Date of issuance for the instrument
LINKED_ID	INTEGER	Yes	-1789839	Unique identifier used to link registered instruments together

sym_sec_entity

This table contains FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings for equity and fixed income securities included in the FactSet Symbology universe. These mappings are provided at the security level.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00011-S	Unique FactSet-generated identifier assigned to a security
FACTSET_ENTITY_ID	CHAR(8)	No	06JN4Y-E	Unique FactSet-generated identifier representing an entity

sym_sec_entity_hist

This table contains historical and current FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) mappings, with dates, for those entities included in the Symbology universe. These mappings are provided for equity and fixed income securities at the security FSYM_ID level.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	FBJRR9-S	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	No	2007-10-05	Date the entity is first associated with the FSYM_ID
END_DATE	DATE	Yes	2008-06-02	Date the entity is no longer associated with the FSYM_ID
FACTSET_ENTITY_ID	CHAR(8)	No	000KYG-E	Unique FactSet-generated identifier representing an entity

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_sec_regulatory

This table contains the FSYM_ID and CIC (Complementary Identification Code) for a given identifier. CIC codes are a four position code used to classify assets for Solvency II reporting.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00044-S	Unique FactSet-generated identifier assigned to a security
CIC_CODE	CHAR(4)	No	GB51	Code representing the primary security's Complementary Identification Code (CIC), which is used to classify assets for Solvency II reporting

sym_sedol

This table contains SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings included in the FactSet Symbology universe. Equity SEDOLs are mapped to regional level and listing level FactSet Permanent Identifiers. Fixed Income SEDOLs are mapped to security level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B000NN-R	Unique FactSet-generated identifier assigned to a security
SEDOL	CHAR(7)	No	BHVGKV6	Seven-character identification code assigned to securities that trade on the London Stock Exchange and various smaller exchanges in the United Kingdom

sym_sedol_hist

This table contains historical SEDOL to FactSet Permanent Identifier (FSYM_ID) mappings for equity listings included in the FactSet Symbology universe. SEDOLs are mapped to regional level and listing level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
SEDOL	CHAR(7)	No	0001434	Seven-character identification code assigned to securities that trade on the London Stock Exchange and various smaller exchanges in the United Kingdom
FSYM_ID	CHAR(8)	No	H40Q2F-R	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	Yes	1988-05-04	Date the identifier was mapped to the FSYM_ID
END_DATE	DATE	Yes	1995-05-23	Date the identifier mapped to the FSYM_ID was considered inactive
MOST_RECENT	BOOLEAN	No	0	Flag indicating whether the identifier is the most recent for the security

sym_ticker_exchange

This table contains exchange specific ticker to FactSet Permanent Identifier (FSYM_ID) mappings included in the FactSet Symbology universe. Exchange specific tickers for equities are mapped to listing level FactSet Permanent Identifiers. Exchange specific tickers for fixed income is mapped to security level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00286-L	Unique FactSet-generated identifier assigned to a security
TICKER_EXCHANGE	VARCHAR(50)	No	YCO-OME	Exchange ticker assigned to the listing or security. The ticker is appended with the exchange code that corresponds to the exchange on which the listing or security trades.

sym_ticker_exchange_hist

This table contains historical exchange specific ticker to FactSet Permanent Identifier (FSYM_ID) mappings for global listings included in the FactSet Symbology universe. Exchange specific tickers are mapped to listing level FactSet Permanent Identifiers.

Field Name	Type	Nullable	Example	Description
TICKER_EXCHANGE	VARCHAR(50)	No	YCO-LON	Exchange ticker assigned to the listing. The ticker is appended with the exchange code that corresponds to the exchange on which the listing trades.
FSYM_ID	CHAR(8)	No	L220W3-L	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	Yes	2008-05-28	Date the identifier was mapped to the FSYM_ID
END_DATE	DATE	Yes	2012-07-02	Date the identifier mapped to the FSYM_ID was considered inactive
MOST_RECENT	BOOLEAN	No	1	Flag indicating whether the identifier is the most recent for the security

sym_ticker_region

This table contains regional ticker to FactSet Permanent Identifier (FSYM_ID) mappings for equity listings included in the FactSet Symbology universe. Regional tickers are mapped to regional level FactSet Permanent Identifiers. Primary listings are included; secondary listings are not supported.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00363-R	Unique FactSet-generated identifier assigned to a security
TICKER_REGION	VARCHAR(50)	No	ESVN-DE	Current or most recent regional ticker assigned to the listing. The ticker is appended with the two digit code that corresponds to the county or region in which the listing trades.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

sym_ticker_region_hist

This table contains historical regional ticker to FactSet Permanent Identifier (FSYM_ID) mappings for those global listings included in the FactSet Symbology universe. Regional tickers are mapped to regional level FactSet Permanent Identifiers. Both primary and secondary listings are supported.

Field Name	Type	Nullable	Example	Description
TICKER_REGION	VARCHAR(50)	No	ESVN-DE	Current or most recent regional ticker assigned to the listing. The ticker is appended with the two digit code that corresponds to the county or region in which the listing trades.
FSYM_ID	CHAR(8)	No	B00363-R	Unique FactSet-generated identifier assigned to a security
START_DATE	DATE	Yes	2000-07-26	Date the identifier was mapped to the FSYM_ID
END_DATE	DATE	Yes	2006-09-12	Date the identifier mapped to the FSYM_ID was considered inactive
MOST_RECENT	BOOLEAN	No	0	Flag indicating whether the identifier is the most recent for the security

sym_wkn

This table contains current FactSet Permanent Identifier (FSYM_ID) to WKN mappings for securities in the FactSet Symbology Universe.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00044-S	Unique FactSet-generated identifier assigned to a security
WKN	VARCHAR(6)	No	A0YJG8	The Wertpapierkennnummer, (WKN, WPKN, WPK or simply Wert), is a German securities identification code. It is composed of six digits or capital letters (excluding I and O), and no check digit.

Entity

Note: Schemas for the SYM_ENTITY, SYM_ENTITY_SECTOR, SYM_ENTITY_SECTOR_RBICS and SYM_CREDIT_PARENT tables can be found under Symbology.

ent_entity_address

This table contains address information for entity locations. Headquarters and secondary office locations are included.

Field Name	Type	Nullable	Example	Description
ADDRESS_ID	INTEGER	No	236303	Unique identifier assigned to an entity's location
FACTSET_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier representing an entity
LOCATION_CITY	VARCHAR(50)	Yes	Redmond	City in the entity's address
STATE_PROVINCE	CHAR(2)	Yes	WA	Two-letter code representing a state or province
LOCATION_POSTAL_CODE	VARCHAR(20)	Yes	98052-6399	Postal code or zip code in the entity’s address
CITY_STATE_ZIP	VARCHAR(115)	Yes	Redmond, WA 98052-6399	Concatenation of a location's city, state / province, and postal / zip code
LOCATION_STREET1	VARCHAR(36)	Yes	1 Microsoft Way	First street line in the entity's address
LOCATION_STREET2	VARCHAR(36)	Yes	NULL	Second street line in the entity's address
LOCATION_STREET3	VARCHAR(36)	Yes	NULL	Third street line in the entity's address
ISO_COUNTRY	CHAR(2)	Yes	US	Two-letter code representing a country
TELE_COUNTRY	VARCHAR(3)	Yes	1	Country code of the telephone number
TELE_AREA	VARCHAR(5)	Yes	425	City or area code of the telephone number
TELE	VARCHAR(15)	Yes	882.8080	Telephone number tied to an address, excluding the country code and area code
TELE_FULL	VARCHAR(25)	Yes	1.425.882.8080	Full telephone number tied to an address, including the country code and area code
FAX_COUNTRY	VARCHAR(3)	Yes	1	Country code of the fax number
FAX_AREA	VARCHAR(5)	Yes	425	City or area code of the fax number
FAX	VARCHAR(15)	Yes	869.1327	Entity's fax number, excluding the country code and area code
FAX_FULL	VARCHAR(25)	Yes	1.425.869.1327	Full fax number, including the country code and area code
HQ	BOOLEAN	No	1	Flag indicating whether the address is the HQ address of the entity; 1=Yes, 0=No

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_address_coord

This table contains longitude and latitude coordinates for ADDRESS_IDs.

Field Name	Type	Nullable	Example	Description
ADDRESS_ID	INTEGER	No	26	Unique identifier assigned to an entity's location
LATITUDE	FLOAT	No	42.35136	Latitude value that corresponds to the location
LONGITUDE	FLOAT	No	-71.053911	Longitude value that corresponds to the location
RESOLUTION_CODE	INTEGER	No	1	Code denoting the level of granularity that corresponds to latitude and longitude coordinates

ent_entity_affiliates

This table contains affiliated entity relationships. Institutional and stakeholder ownership-based relationships between entities will be included where the percent held is greater than 1%.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000DGZ-E	Unique FactSet-generated identifier representing an entity that has a relationship with the affiliated entity
FACTSET_AFFILIATED_ENTITY_ID	CHAR(8)	No	0014HM-E	Unique FactSet-generated entity level identifier assigned to affiliated entity
PCT_HELD	DOUBLE	Yes	9.116076	Percent of affiliated entity held by the entity. This is only available for Ownership related affiliation types.
AFF_TYPE_CODE	INTEGER	No	3	Code representing the type of relationship between an entity and an affiliated entity

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_changes

This table contains a history of changes to entities. The following types of changes are included in this file: FACTSET_PARENT_ENTITY_ID, ENTITY_TYPE, and ADDRESS_ID.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	0086FQ-E	Unique FactSet-generated identifier representing an entity
CHANGE_TYPE	VARCHAR(24)	No	FACTSET_PARENT_ENTITY_ID	Field that corresponds to the entity's attribute that was changed. Headquarter location changes can be found by leveraging ADDRESS_ID.
CHANGE_DATE	DATE	No	2010-09-17	Date on which the change took place
OLD_VALUE	VARCHAR(254)	Yes	05YTFT-E	Previous value of the attribute
NEW_VALUE	VARCHAR(254)	Yes	002506-E	New value of the attribute
AUDIT_TYPE	INTEGER	Yes	8	Code denoting the source of the change (e.g., press release, web, M&A, Ownership)
COMMENTS	VARCHAR(256)	Yes	NULL	Textual field containing deal synopsis information where the source of the change is M&A activity
AUDIT_ID	VARCHAR(69)	Yes	554472	Unique identifier that can be used with other data sets to obtain more information about the change

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_cn_names

This table contains business names in Simplified and Traditional Chinese.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	063ZS5-E	Unique FactSet-generated identifier representing an entity
ENTITY_NAME_TYPE	VARCHAR (35)	No	SIMPL_CHINESE_ENTITY_NAME	Textual description of the name value. Possible values include SIMPL_CHINESE_ENTITY_NAME and TRAD_CHINESE_ENTITY_NAME
ENTITY_NAME_VALUE	VARCHAR (512)	No	湖南华升股份有限公司	Name that corresponds to the ENTITY_NAME_TYPE

ent_entity_cn_profiles

This table contains business descriptions in Simplified and Traditional Chinese.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	05NPN6-E	Unique FactSet-generated identifier representing an entity
ENTITY_PROFILE_TYPE	CHAR(3)	No	SCD	Code identifying different types of textual overviews
ENTITY_PROFILE	VARCHAR(8000)	No	广深铁	Textual description of the entity's primary business operations

ent_entity_contact

This table contains additional contact information for entities. Corporate email and registered address are included.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	0016FD-E	Unique FactSet-generated identifier representing an entity
CONTACT_TYPE	VARCHAR(30)	No	CORP_EMAIL	Description of the type of contact information provided
CONTACT_VALUE	VARCHAR(200)	No	mediainquiry@citrix.com	Contact information for the entity

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_country_props

This table contains information on different types of organizations or agreements that a country may be involved with, including EEA (European Economic Area), OECD (Organization for Economic Co-operation and Development), and Intergovernmental Agreements (IGAs). Information is also provided for the FinCEN Financial Action Task Force AML/CFT Deficiencies.

Field Name	Type	Nullable	Example	Description
PROP_ID	INTEGER	No	1	Unique FactSet-generated identifier assigned to a country property
ISO_COUNTRY	CHAR(2)	No	BM	Two-letter code representing a country
COUNTRY_PROP	VARCHAR(30)	No	IGA	Textual description of the country designation
COUNTRY_PROP_DETAIL	VARCHAR(30)	Yes	Model 2	Detailed description related to the country property, if relevant

ent_entity_coverage

This table contains descriptive data about the entity.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier representing an entity
ENTITY_NAME	VARCHAR(72)	No	MICROSOFT CORP	Name of the entity in generic US ASCII format, used to facilitate searching and sorting
ENTITY_PROPER_NAME	VARCHAR(72)	No	Microsoft Corporation	Name that the entity is commonly referred to as, normalized and in proper case
PRIMARY_SIC_CODE	CHAR(4)	Yes	7372	Four-digit code that identifies the business type of the entity
INDUSTRY_CODE	CHAR(4)	Yes	3310	FactSet proprietary industry code assigned to the entity
SECTOR_CODE	CHAR(4)	Yes	3300	Four-digit code identifying FactSet broad industry sector classification
ISO_COUNTRY	CHAR(2)	Yes	US	Two-letter code for the country in which the entity is domiciled. This would be the country that corresponds to the entity's headquarters. For funds the domicile represents where the fund is registered and established.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Field Name	Type	Nullable	Example	Description
METRO_AREA	VARCHAR(25)	Yes	Seattle / WA Metro	Metropolitan area of the entity's headquarters
STATE_PROVINCE	CHAR(2)	Yes	WA	Two-letter code representing a state or province
ZIP_POSTAL_CODE	VARCHAR(20)	Yes	98052-6399	Postal code of the entity's headquarters
WEB_SITE	VARCHAR(100)	Yes	www.microsoft.com	Web page address for the entity
ENTITY_TYPE	CHAR(3)	Yes	PUB	Three-letter code identifying the entity's structure
ENTITY_SUB_TYPE	CHAR(2)	Yes	CP	Two-letter code generally identifying the type of institution, usually within a buy-side or sell-side framework
YEAR_FOUNDED	INTEGER	Yes	1975	Year the entity was founded
ISO_COUNTRY_INCORP	CHAR(2)	Yes	US	Two-letter code denoting the country where the entity is incorporated
ISO_COUNTRY_COR	CHAR(2)	Yes	US	Two-letter code representing the entity's country of risk, as determined by FactSet
NACE_CODE	CHAR(5)	Yes	58.29	Code representing the NACE class, which is a European standard industry classification system
ISO_COUNTRY_TOP_GEOREV	CHAR(2)	Yes	US	Two-letter code representing the country where the entity sources its largest revenue, using FactSet GeoRev methodology
ISO_COUNTRY_COR_GEOREV	CHAR(2)	Yes	US	The entity’s country of risk, determined by FactSet and based on an enhanced methodology that leverages the top geo country calculation and additional country risk factors.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_descriptions

This table contains textual business descriptions for all entities in FactSet's universe.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	05NPN6-E	Unique FactSet-generated identifier representing an entity
ENTITY_PROFILE_TYPE	CHAR(3)	No	PRO	Code identifying different types of textual overviews
ENTITY_PROFILE	VARCHAR(8000)	No	Founded in 1983	Textual description of the entity's primary business operations

ent_entity_identifiers

This table contains entity level identifiers including CIK, CRD, EIN, RSSD, UKCH, JCN and LEI. This table may also contain SWIFT BIC, VAT, ABN, USCC, Creditsafe, and Crunchbase Identifiers based on user subscriptions.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	123456-E	Unique FactSet-generated identifier representing an entity
ENTITY_ID_TYPE	VARCHAR(12)	No	LEI	Code denoting a type of entity identifier
ENTITY_ID_VALUE	VARCHAR(100)	No	BH1KKKGKNGL4QXOTVL78	Identifier that corresponds with the ENTITY_ID_TYPE

ent_entity_metro_areas

This table contains mappings from entities to their metro area identifier.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier representing an entity
METRO_ID	INTEGER	No	140	Identifier that corresponds to the metropolitan area for the entity

ent_entity_mkt_val

This table provides a time series of company market values for the FactSet Entity Identifier (-E) Level. This table does not include ETFs or Funds.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000KYG-E	Unique FactSet-generated identifier representing an entity
MV_DATE	DATE	No	2019-01-01	Date of the Entity Level Market Value observation

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

CURRENCY	CHAR(3)	No	USD	Code representing the currency in which the security or listing trades
ENT_MV	DOUBLE	Yes	1000000	Entity Level Market Value including all share types
ENT_MV_EX_NON_TRADED	DOUBLE	Yes	1000000	Entity Level Market Value excluding non-traded shares
ENT_MV_EX_TREASURY	DOUBLE	Yes	1000000	Entity Level Market Value excluding treasury shares
ENT_MV_EX_NONTRADED_TREASURY	DOUBLE	Yes	1000000	Entity Level Market Value excluding non-traded shares and treasury shares

ent_entity_naics_rank

This table contains NAICS 2022 industry classification codes for entities.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier representing an entity
NAICS_CODE	INTEGER	No	523999	Code denoting the NAICS classification
RANK	INTEGER	No	1	Rank of importance to the entity of the industry represented by the NAICS code

ent_entity_names

This table contains other names that the entity may be referred to as, including former names, legal names, local names, trade/DBA names, and acronyms.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	063ZS5-E	Unique FactSet-generated identifier representing an entity
ENTITY_NAME_TYPE	VARCHAR(35)	No	TRADE_DBA_NAME	Textual description of the name value. Possible values include LOCAL_NAME, TRADE_DBA_NAME, SHORT_NAME, FORMER_NAME, and LEGAL_NAME.
ENTITY_NAME_VALUE	VARCHAR(512)	No	Subway Restaurants	This field contains the name that corresponds to the ENTITY_NAME_TYPE

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_entity_profiles

This table contains textual overviews of entities, including business description, product lines, and investment approach and overview.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	05NPN6-E	Unique FactSet-generated identifier representing an entity
ENTITY_PROFILE_TYPE	CHAR(3)	No	PRO	Code identifying different types of textual overviews
ENTITY_PROFILE	VARCHAR(8000)	No	Hype, Inc., part of Ligado Networks LLC, is a company	Textual description of the entity's primary business operations

ent_entity_relationships

This table contains relationships between two entities.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000CN6-E	Unique FactSet-generated identifier representing an entity
ENTITY_RELATION_TYPE	INTEGER	No	57	Code denoting the type of relationship that exists between two entities
FACTSET_RELATED_ENTITY_ID	CHAR(8)	No	05J84P-E	Unique FactSet-generated identifier assigned to the related entity

ent_entity_status

This table contains entities that have had a status change. Bankruptcy is currently the only status change captured in this table.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000BFG-E	Unique FactSet-generated identifier representing an entity
ENTITY_STATUS_CODE	INTEGER	No	21	Code denoting the entity's status
START_DATE	DATE	No	1987-02-06	Date that the status became effective
END_DATE	DATE	Yes	1997-10-28	Date the status was no longer effective

ent_entity_str_hist

This table contains current and historical entity hierarchy relationships, with dates, including immediate and ultimate parent.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	05NPN6-E	Unique FactSet-generated identifier representing an entity

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

START_DATE	DATE	No	1998-10-23	The first date the relationship became effective. See the Appendix C: Using Historical Data section for additional details.
END_DATE	DATE	Yes	2010-03-29	The date the relationship is no longer effective. See the Appendix C: Using Historical Data section for additional details.
FACTSET_PARENT_ENTITY_ID	CHAR(8)	Yes	002GDV-E	Unique FactSet-generated identifier assigned to the immediate majority owner of the entity's equity
FACTSET_ULT_PARENT_ENTITY_ID	CHAR(8)	No	002GDV-E	Unique FactSet-generated identifier assigned to the ultimate parent to which the entity rolls up
DEPTH	INTEGER	Yes	2	The position of the entity within an entity tree 1 = ultimate parent, 2=one level below the ultimate parent, etc.
AUDIT_TYPE	INTEGER	Yes	8	Code denoting the source of the change (e.g., press release, web, M&A, Ownership)
AUDIT_ID	VARCHAR(69)	Yes	33812	Unique identifier that can be used with other data sets to obtain more information about the change

ent_entity_structure

This table contains parent hierarchy relationships.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier representing an entity
FACTSET_PARENT_ENTITY_ID	CHAR(8)	Yes	NULL	Unique FactSet-generated identifier assigned to the immediate majority owner of the entity's equity
FACTSET_ULTIMATE_PARENT_ENTITY_ID	CHAR(8)	No	000Q07-E	Unique FactSet-generated identifier assigned to the ultimate parent to which the entity rolls up

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

ent_fitch_ids

This table contains mappings from the FACTSET_ENTITY_ID to the Fitch issuer level identifier.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	069J8N-E	Unique FactSet-generated identifier representing an entity
FITCH_ID	INTEGER	No	702550	Issuer level identifier according to Fitch
FITCH_NAME	VARCHAR(160)	No	AT&T Inc.	Issuer name according to Fitch

ent_moodys_ids

This table contains mappings from the FACTSET_ENTITY_ID to the Moody’s issuer level identifier.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	069J8N-E	Unique FactSet-generated identifier representing an insider or stakeholder
MOODYS_ID	INTEGER	No	702550	Issuer level identifier according to Moody's
MOODYS_NAME	VARCHAR(160)	No	AT&T INC.	Issuer name according to Moody's

ent_sp_ids

This table contains mappings from the FACTSET_ENTITY_ID to the S&P issuer level identifier.

Field Name	Type	Nullable	Example	Description
FACTSET_ENTITY_ID	CHAR(8)	No	069J8N-E	Unique FactSet-generated identifier representing an entity
SP_ID	INTEGER	No	109413	Issuer level identifier according to S&P
SP_NAME	VARCHAR(160)	No	AT&T Inc.	Issuer name according to S&P

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Address and People Mappings

Note: The schema for the SYM_ENTITY table can be found under Symbology.

sym_address

This table contains mappings for ADDRESS_IDs published in any Standard DataFeed.

Field Name	Type	Nullable	Example	Description
ADDRESS_ID	INTEGER	No	122	Unique identifier assigned to an entity's location
CITY_STATE_POSTAL	VARCHAR(115)	Yes	Jersey City, NJ 07311-4010	City, state, and postal code in the entity's address
LOCATION_STREET1	VARCHAR(36)	Yes	Harborside Financial Center	First street line in the entity's address
LOCATION_STREET2	VARCHAR(36)	Yes	Plaza 5	Second street line in the entity's address
LOCATION_STREET3	VARCHAR(36)	Yes	Suite 1640	Third street line in the entity’s address
ISO_COUNTRY	CHAR(2)	Yes	US	Two-letter code representing the country in which the address is located
TELE_FULL	VARCHAR(25)	Yes	1.201.985.1111	Full telephone number tied to an address, including the country code and area code
FAX_FULL	VARCHAR(25)	Yes	1.201.985.1200	Full fax number, including the country code and area code

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Legacy Identifier Mappings

sym_legacy_entity_id

This table contains current to legacy FactSet Entity Identifier mappings.

Field Name	Type	Nullable	Example	Description
LEGACY_ENTITY_ID	INTEGER	No	10001	Legacy FactSet-generated identifier assigned to an entity or an individual
FACTSET_ENTITY_ID	CHAR(8)	No	000BDM-E	Unique FactSet-generated identifier representing an entity

sym_legacy_perm_id

This table contains mappings from legacy FactSet security permanent identifiers to FSYM identifiers.

Field Name	Type	Nullable	Example	Description
FSYM_ID	CHAR(8)	No	B00001-L	Unique FactSet-generated identifier assigned to a security
FS_PERM_SEC_ID	VARCHAR(20)	No	X41K76-S-DE	Unique FactSet-generated identifier assigned to a security. This is the legacy FactSet Permanent Identifier.

sym_retired_entity_ids

This table contains mappings from entities for funds that will be retired in future to surviving entities.

Field Name	Type	Nullable	Example	Description
RETIRED_FACTSET_ENTITY_ID	CHAR(8)	No	0CJNN5-E	Unique FactSet-generated identifier for an entity that will be retired
SURVIVING_FACTSET_ENTITY_ID	CHAR(8)	No	05WQ90-E	Unique FactSet-generated identifier for an entity that will be the survivor

FACTSET

Appendix C: Using Historical Data

Historical Entity Structure

The data included in the ENT_ENTITY_STR_HIST table can be used to view historical entity trees. FactSet's historical entity structure allows the user to identify parent and ultimate parent data at a given point in time. This table can be used along with SYM_SEC_ENTITY_HIST, which provides historical security to issuer relationships, to view a company's hierarchy.

Note the following:

- FactSet has introduced start dates for each entity to reflect when the entity was formed. The oldest records you will see reflect the inception date of the entity formation; however, relationships to parent and ultimate parent prior to a START_DATE of 2006-01-01 may not reflect precise dates. In addition, unknown inception dates will be displayed as 1900-01-01; however, if the year is known START_DATE will display as YYYY-01-01.
- The END_DATE represents the date the relationship became inactive. A NULL END_DATE indicates an active relationship.
- The FACTSET_PARENT_ENTITY_ID represents the parent entity for the specified date range. This field will display as NULL if the entity does not have a parent (i.e., a stand- alone entity)
- The FACTSET_ULT_PARENT_ENTITY_ID represents the ultimate parent entity for the specified date range. This field will display the same as FACTSET_ENTITY_ID if the entity does not have an ultimate parent (i.e., a stand- alone entity)
- The DEPTH field indicates the position of the entity within an entity tree, 1 = ultimate parent, 2=one level below the ultimate parent, etc. Events at a higher level in the entity structure result in depth changes for child entities. For example, if there is a restructuring and the parent entity becomes a subsidiary of another entity within the same tree, the depth will change.

Historical Security to Entity Linkages

Historical security to entity linkages can be found in SYM_SEC_ENTITY_HIST. Both equity and fixed income securities will be processed into the same table. For equity security to entity linkages FactSet uses SEDOL first price date, and for US/CA securities will use the CUSIP first price date to determine the start date of the security to entity relationship.

Note the following for fixed income mappings:

- The universe consists of all fixed income securities that can be mapped to a FACTSET_ENTITY_ID.
- A fixed income security will be linked to its original issuer and that original issuer should not change. As a result, there will only be one set of start and end dates per FSYM_ID.
- The start and end dates will be populated with valid dates for corporate, government, and agency securities.
  - The START_DATE is the issue date or dated date if the issue date is not available.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

  - The END_DATE is the redemption date.

- For all other security types, the START_DATE will display as 1900-01-01 and the END_DATE will display as NULL for active securities.

- For inactive securities, both the START_DATE and END_DATE will display as 1900-01-01 if the dates are unknown. In addition, if the END_DATE is greater than today, this indicates an early redemption on the bond, but the redemption date is unknown.

Historical Identifier Mapping

- The START_DATE represents the date the identifier was mapped to the FSYM_ID.

- The END_DATE represents the date the identifier mapped to the FSYM_ID was considered inactive. A value of NULL indicates an active record.

- For the SYM_CUSIP_HIST, SYM_ISIN_HIST, and SYM_SEDOL_HIST tables, the START_DATE field may include a future date, or date greater than today. In addition, a value of 9999-12-31 will be populated in the END_DATE field and can be used to easily identify the records with upcoming changes that will become effective on the START_DATE in the future.

  - These records can be published up to 2-5 days in advance of the event

    See the example below:

    Prior to trading, both future / pre-market identifiers and the active identifier will exist as separate records. On the date the new identifier becomes active, the END_DATE field will be updated to NULL and the MOST_RECENT field will be set to 1.

    Upcoming / Future change prior to the effective date:

cusip	fsym_id	start_date	end_date	most_recent
22003W308	CQVKXJ-S	1998-08-18	2019-01-31	0
94107F200	CQVKXJ-S	2019-01-31	NULL	1
123456789	CQVKXJ-S	2020-10-12	9999-12-31	0

    On or after the effective date:

cusip	fsym_id	start_date	end_date	most_recent
22003W308	CQVKXJ-S	1998-08-18	2019-01-31	0
94107F200	CQVKXJ-S	2019-01-31	2020-10-12	0
123456789	CQVKXJ-S	2020-10-12	NULL	1

Historical Credit Parent Relationships

Historical FactSet Permanent Identifier (FSYM_ID) to FactSet Entity Identifier (FACTSET_ENTITY_ID) linkages for credit parent relationships can be found in SYM_CREDIT_PARENT_HIST. For a small subset of records, the

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

inception dates for the security are unknown. FactSet uses a system generated date '1900-01-01' to identify these unknown start dates.

Retired Entity Identifier Mapping

The 'Retired Entity ID Mappings' bundle publishes mappings between entities that will be retired by FactSet in future to the surviving entities. The entities affected are a universe of funds where FactSet maintains two different identifiers in Ownership and Symbology. The goal of this package is to allow users to map the two different entity identifiers together, and to show which identifier will be the survivor identifier that will be used in the future.

The example below explains a scenario where this package could be useful.

- A user subscribed to FactSet's Ownership DataFeed wants to identify holdings for 'Aberdeen Global Dynamic Dividend Fund' represented by the ticker 'AGD-US'. Using Symbology, the user can map the ticker to the FSYM_ID and join the Ownership DataFeed to identify the FACTSET_FUND_ID tied to the FSYM_ID using the query below.

```
select t.ticker_region, h.fsym_id, h.factset_entity_id
from sym_v1.sym_ticker_region t
join sym_v1.sym_coverage c on t.fsym_id = c.fsym_id
join own_v5.own_sec_entity_hist h on h.fsym_id = c.fsym_security_id
where t.ticker_region = 'AGD-US'
```

Results | Messages

ticker_region	fsym_id	factset_entity_id
AGD-US	LKXF28-S	0088RD-E

- While the ticker eventually maps to the FACTSET_ENTITY_ID '0088RD-E', the FACTSET_ENTITY_ID does not exist as a fund within the Ownership DataFeed which can be misleading.

```
select * from own_v5.own_ent_funds where factset_fund_id = '0088RD-E'
```

Results | Messages

factset_fund_id	factset_inst_entity_id	fund_type	current_report_date	style	turnover_label	pe_ratio	pb_ratio	dividend_yield	sales_growth	price_momentum	relative_strength	beta	fund_family	etf_type	active_flag

- Essentially, that identifier for the fund does exist within the Ownership DataFeed but is represented by a different FACTSET_FUND_ID. In such cases, the sym_retired_entity_ids table can be used to identify if the Ownership DataFeed is using a RETIRED_FACTSET_ENTITY_ID to represent the fund.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

```
select r.*, f.factset_fund_id 'Fund Id in Ownership'
from sym_v1.sym_retired_entity_ids r
join own_v5.own_ent_funds f on r.retired_factset_entity_id = f.factset_fund_id
where surviving_factset_entity_id = '0088RD-E'
```

%

Results | Messages

retired_factset_entity_id	surviving_factset_entity_id	Fund Id in Ownership
04CYCC-E	0088RD-E	04CYCC-E

FACTSET

Appendix D: Using Derivatives Data

Note the following when using Symbology derivatives data.

Futures

- **Currency Value "CTS"**

  The CURRENCY field typically contains ISO Currency values that can be found in the ref_v2.iso_currency_map table. In the Futures package, the CURRENCY field in the sym_futures_root table contains a user-defined value "CTS", which represents U.S. Cents.

- **Daily Contracts**

  If the values in the CONTRACT_MONTH and CONTRACT_YEAR fields are "0", and there is an expiration date, then the contract is a daily contract.

- **Continuous Contracts**

  If the values in the CONTRACT_MONTH and CONTRACT_YEAR fields are "0", and the expiration date is NULL, then the contract is considered continuous.

- **Contract Month and Year Fields**

  The contract year and month values are the year and month that the contract delivers. It is not the same as the year and month of the expiration date, as some contracts can expire a month or two prior to delivery.

Options

- **Settlement Method**

  The SETTLE_METHOD field denotes if the settlement method is PHYSICAL or CASH. This field will not always contain a value. It will be NULL when the FREF_EXCHANGE_CODE field is equal to any of the following exchange codes: ASX, BOM, EMD, EUR, HKO, IFEU, IFUS, LIF, MOD, OMX, OSL, USA.

- **Expiration Frequency**

  The EXP_FREQUENCY field is the interval of expiration. This field will not always contain a value. It will be NULL when the FREF_EXCHANGE_CODE field is equal to any of the following exchange codes: ASX, BOM, BUD, CBTE, CMEE, DMI, EMD, EUR, HKO, IFEU, KRX, LIF, MOD, MRV, NYME, OMX, OSE, OSL, TAE, TFEX, USA, WAR.

- **Expiration Date**

  The EXP_DATE is the last day the contract can trade. Prior to 2010, the expiration date was on a Saturday. In 2013, the expiration date moved from Saturday to Friday.

FACTSET

Appendix E: Data Item Definitions

Entity Identifier Types

The table below describes the different entity identifier types available in the Entity Master package.

Table 26: Entity Identifier Types Definitions

Entity Identifier Type	Definition
CIK	The Central Index Key (CIK) identifier maintained by SEC to identify entities and people that have filed disclosures with the SEC.
CRD	The Central Registration Depository (CRD) identifier maintained by FINRA.
LEI	The Legal Entity Identifier (LEI) in accordance with the ISO 17442 standard. FactSet sources LEI data from the Global LEI Foundation (GLEIF).
BIC	The Bank Identifier Code (BIC) identifier maintained by SWIFT.
UKCH	The numeric identifier for a company registered with Companies House in the United Kingdom.
RSSD	Unique identifier assigned to institutions by the Federal Reserve.
EIN	The Employer Identification Number (EIN) is also known as a Federal Tax Identification Number, and is used to identify a business entity.
JCN	The corporate number is a 13-digit unique identifier for every corporation in Japan. The National Tax Agency assigns this number and makes this information public along with the corporation's trade name, address of its head office or its principal place of business.
CS	A unique alphanumeric identifier used by Creditsafe to reference and track businesses in its global company database.
CB	A 32-character alphanumeric identifier with hyphens assigned to organizations, people, or entities in the Crunchbase database to reference their profiles.
VAT	The Value-Added Tax (VAT) identification number is assigned by national tax authorities to entities registered for VAT purposes.
ABN	The Australian Business Number (ABN) is an 11-digit identifier assigned by the Australian Taxation Office to businesses operating in Australia.
USCC	The Unified Social Credit Code (USCC) is an 18-character alphanumeric identifier assigned by the State Administration for Market Regulation (SAMR) to businesses and entities operating in China.

Entity Name Types

The table below describes the different entity name types available through the Entity Master and Chinese Business Names and Descriptions packages.

Table 27: FactSet Entity Name Types Definitions

Entity Name Type	Definition
ENTITY_NAME	The name of the entity in generic US ASCII format, used to facilitate searching and sorting.
ENTITY_PROPER_NAME	The name that the entity is commonly referred to, normalized with punctuation and in proper case.
FORMER_NAME	A name used by the entity historically.
LEGAL_NAME	The legal name of the entity according to registration documents.

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

LOCAL_NAME	A name that is used locally to represent the entity. For example, Austrian Airlines AG has a local name of Österreichische Luftverkehrs AG.
SHORT_NAME	The acronym of the entity (for example, IBM would be the SHORT_NAME for International Business Machines), or a shortened version of the company name (without the Corp. or Co., Inc., etc.).
TRADE_DBA_NAME	The TRADE_DBA_NAME captures the name that the company is doing business as. One of the most common examples is Doctor's Associates, Inc., which is doing business as Subway Restaurants.
SIMPL_CHINESE_ENTITY_NAME	Business name in Simplified Chinese.
TRAD_CHINESE_ENTITY_NAME	Business name in Traditional Chinese.

Entity Relationship Types

The table below defines the various relationships that FactSet identifies between entities.

Table 28: FactSet Entity Relationship Types Definitions

Entity Relation Type Description	Definition
Dual Listed Company	This relationship is used to identify pairs of legally distinct, publicly traded firms which, for certain purposes, operate as a single economic entity (e.g., reporting of financials).
CB-Corporate Broker	U.K. public companies are required to appoint a Corporate Broker. The Corporate Broker acts as the main interface with the stock market, assessing market conditions and the demand for the company's shares, and helping enhance the liquidity in the shares. The Corporate Broker also contributes to the company's communication and actively markets the company's shares to potential investors, both at floatation and in the after-market. FactSet sources this information from company websites as well as RNS announcements.
CB-Share Registrar	U.K. public companies are required to maintain an up-to-date record of the owners of their shares. This record is known as the Register of Members or Share Register. The Share Registrar is responsible for maintaining as well as updating the Share Register when shares are bought or sold through the electronic settlement service of the London Stock Exchange (CREST) or through the transfer of a share certificate.
CB-NOMAD	A Nominated Advisor is an entity that has been authorized by the London Stock Exchange to provide advice to entities seeking to list on the Alternative Investment Market (AIM). A NOMAD will provide advice on the company's suitability for AIM and continue to provide advice and assistance throughout the company's listing. All securities wishing to list on AIM are required to have a NOMAD and all NOMADs must be approved by the London Stock Exchange. FactSet sources this information from company websites as well as RNS announcements.
CB-Financial Advisor	The Financial Advisor assists and advises U.K. public companies on all financial decisions and obligations. The Financial Advisor focuses on the finances of the company and may work alongside the Corporate Broker to provide financial advice in relation with the raising of capital through corporate actions, etc. FactSet sources this information from company websites as well as RNS announcements.
Variable Interest Entity	A variable interest entity (VIE) is an entity that has been established to comply with foreign ownership restrictions within the Peoples Republic

Copyright © 2023 FactSet Research Systems Inc. All rights reserved. FactSet Business Use Only

Entity Relation Type Description	Definition
	of China (PRC). The PRC prohibits foreign ownership of Chinese companies that operate in certain industries (e.g., Internet; News Broadcasting; etc.). To comply with these restrictions but still allow for foreign investment, certain Chinese companies will establish affiliated companies that are wholly owned by Chinese nationals. Such a domestically owned company will hold the licenses, patents, etc., and will enter contractual relationships with the entity with foreign investment. The domestically owned entity is called a Variable Interest Entity.
Fund-Contributor	Fund-Contributor also referred to as the Fund Issuer or Management Company. This is an administrative relationship in which the Fund Issuer is legally responsible for the fund and its structure.
Fund-Investment Manager	A Fund's Investment Manager is the entity that makes the day-to-day decisions about which investments the fund holds, purchases, and sells. Essentially, this is the entity that manages the fund's portfolio of holdings.
